

# CF Coordinate Transformer User Manual

V 1.0.0.1

1. The **CF Software Coordinate Transformer** is a Windows 8.0 store application that translates between the three major coordinate systems:

2. On startup, the data entry screen will appear with the coordinates for the xyz unit vector displayed. ([Figure 1](#)).

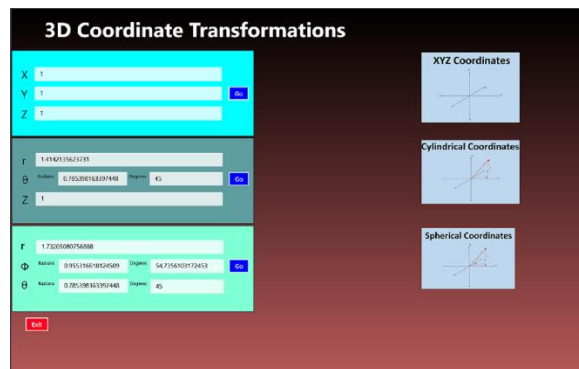

Figure 1 – Startup Screen

3. To transform coordinates, fill in the values for any one of the three systems, then click on the Go button. The transformed coordinates for the other two types will be calculated and displayed.
4. **Errors** – If an error occurs, a message box will popup. Normally, the error message will be self-explanatory. If an unexpected error happens, please email the text of the error to:

[coordxport@cfsw.biz](mailto:coordxport@cfsw.biz)

5. Please email any problem descriptions or improvement suggestions to:

[coordxport@cfsw.biz](mailto:coordxport@cfsw.biz)
